

Solar Cell Array with Multiple Voltage Output

Descriptions

This solar cell array consists of four single unit (1.5V) can be used individually or combined into series 1.5V/3V/4.5V/6V DC. Max. 2.6W output.

Open circuit approx. 6V, short circuit current per cell approx. 450mA .

Elevation angle 0 to 80°

*Standard packing: paper box
