

PP Chemical Waste Cabinet

Description:

First and foremost, welded polypropylene and metal-free structure will ensure this unit won't corrode. It is equipped with leakage-proof adjustable shelves, which could be detached out to be cleaned. For added security, the user can use a padlock on the lock hasp. In addition, this 4 & 4-Gallon capacity polypropylene cabinet can store strong corrosive chemicals, such as sulphuric acid, nitric acid, and acetic acid. Also, it comes with clear labels to indicate corrosive chemicals stored inside. We also have other materials for chemical storage cabinet: steel MC series and Polyethylene series. We manufacture and supply our cabinet in accordance with OSHA & NFPA standards.
